

Attempt 1

I entered all the keywords I wanna have at the beginning. And the AI appended some sentences to it. I cannot say it understands my intention, but it turned out to be fun enough.

<p>Generate Options</p> <p>Learn more in the docs.</p> <p>Length to generate ⓘ</p> <p><input type="range"/> 300</p> <p>Try to include these words ⓘ</p> <p>Type some words</p> <p><input type="checkbox"/> Start at beginning ⓘ</p> <p>Advanced Settings »</p>	<p>a co working space for parents, kids, and community experts, a project documentation and management tool, a digital portfolio for organizing projects and conferences, a community where people can post resources for other parents, and a dating community for parents.</p> <p>We hope that parents will have the opportunity to learn from a diverse community of professionals who are successful at parenting in today's market. In</p> <p>×</p>

Attempt 2

In my second attempt, I entered keywords a little bit by a little bit, hoping I can change its direction when I sense things are not right. BUT I failed... cannot stop it from its wild imagination. LOL.

In the example below, green are generated by the machine.

I wanna build a co working platform for kids, parents and community experts, in which they can create a space, where the parents can reach out to other parents, they can work with the community professionals, kids can learn and grow.

Don't they run things like that already?

It should be a digital project documentation and management tool also.

So, while the audience becomes digital, they also become creators.

And since they are digital creators, they can add a social media post about it or include links to other available communities.

Creating a documentary type of 'living and breathing' document for us who know about it, listening to them, documenting and using their knowledge.

Not only documenting their memories, but also tracking their success rates, achievements, innovation and
